EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. Claims 1-9 and 11-15 (renumbered claims 1-14) are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the primary reason for allowance is that the prior art fails to teach or reasonably suggest a touch-sensitive shutter button producing a touch signal in response to the touching of a user's finger on the button, and producing an actuation signal upon actuation of the button by a user, and a processor responsive to the touch signal to cause the display to display an image from the image sensor, responsive to the actuation signal to cause image data from the image sensor device to be stored in the storage medium, and responsive to the absence of the touch signal to cause the display to display an image and/or related data from the storage medium.

As for claim 7, the primary reason for allowance is that the prior art fails to teach or reasonably suggest a touch sensitive shutter button wherein merely touching the shutter button without pressing the shutter button down is sufficient to cause the shutter button to produce a signal that causes the display to receive image data from the image sensor and display the images.

With regard to claim 8, the primary reason for allowance is that the prior art fails to teach or reasonably suggest providing a touch sensitive shutter button wherein merely touching the shutter button without pressing down the shutter button is sufficient to cause the display to display an instantaneous image from an image sensor and displaying data from a storage medium of the camera in the absence of the touch signal when the display is activated.
